Collection*

"Somebody will say we are dreamers
We handcraft them for the love of our traditions
Following the desires of our clients
From the drawing to the very last detail
Taking pride in durability
We love to share our passion with our clients
This is who we are"

Only a few materials, such as metal, has impressed and are still inspiring the human civilization nowadays. At present day, along with the other new forms of communication, advanced means of transportation and current sources of energy, metals still remain vital in our technology.

In Florence, metals assume new shapes and with better functions. In environment like this, the poetry of cold iron, subdued with hammer, anvil, fire and water, transform itself into artistic chandeliers of imposing beauty. It is somehow a magical story that every day, since the 70's, MECHINI still forges metals that turns to masterpieces.

MECHINI has grown significantly during the past decades specializing in creating high quality wrought iron items. Managed by passionate people that are highly skilled and with knowing hands, one can only expect that they are producing masterwork pieces in the lighting industry. You can feel in each pieces the richness of colours, the regal and elegance, and most importantly, its distinct and refined features that only MECHINI CHANDELIERS can create.
